Contents of Volume 95

Number 1, 7 March 1982

RIDLEY, J. N., Computer Stimulation of Contact Pressure in Capitula 1

FROHLICH, C. and BUSKIRK, R. E., Transmission and Attenuation of Vibration in Orb Spider Webs 13

HARVEY, P. H., On Rethinking Allometry 37

GREEN, R. F., Optimal Foraging and Sex Ratio in Parasitic Wasps . 43

MULLER, M., OSSE, J. W. M. and VERHAGEN, J. H. G., A Quantitative Hydrodynamical Model of Suction Feeding in Fish . . 49

BASS, L., The Variance of Transit Times of Indicators through a Vascular Bed 81

PULLIAM, H. R., PYKE, G. H. and CARACO, T., The Scanning Behaviour of Juncos: A Game-theoretical Approach . . 89

RICARD, J. and SOULIE, J-M., Self-organization and Dynamics of an Open Futile Cycle 105

SVETINA, S., Relations Among Variations in Human Red Cell Volume, Density, Membrane Area, Hemoglobin Content and Cation Content 123

CARROLL, J. P., On Emmetropization 135

NODA, H., Probability of Life. Rareness of Realization in Evolution 145

YADAV, J. S., BARNICKEL, G., BRADACZEK, H. and LABISCHINSKI, H., Quantum Chemical Studies on the Conformational Structure of Bacterial Peptidoglycan. II. PCILO Calculations on the Monosaccharides 151

YADAV, J. S., BARNICKEL, G., BRADACZEK, H. and LABISCHINSKI, H., Quantum Chemical Studies on the Conformational Structure of Bacterial Peptidoglycan. III. CNDO and INDO Calculations on the N-Acetyl-Glucosamine 167

GRIFFING, B., A Theory of Natural Selection Incorporating Interaction Among Individuals. IX. Use of Groups Consisting of a Mating Pair and Sterile Diploid Caste Members . . . 181

GRIFFING, B., A Theory of Natural Selection Incorporating Interaction Among Individuals. X. Use of Groups Consisting of a Mating Pair Together with Haploid and Diploid Caste Members . 199

Number 2, 21 March 1982

PAPENTIN, F., On Order and Complexity. II. Application to Chemical and Biochemical Structures 225

BRAUER, F. and SOUDACK, A. C., On Constant Effort Harvesting and Stocking in a Class of Predator–Prey Systems . . . 247

MOYNIHAN, M., Spatial Parameters and Interspecific Social Relations: Some Differences Between Birds and Fishes . . 253

KUMAR, S., A Model for the Mechanism of Action of Animal Fatty Acid Synthetases 263

YADAV, J. S., BARNICKEL, G., BRADACZEK, H. and LABISCHINSKI, H., Quantum Chemical Studies on the Conformational Structure of Bacterial Peptidoglycan. IV. PCILO Calculation on the Disaccharide Part of the Glycan Moiety 283

TORO, M. A., Altruism and Sex Ratio 303

VENIERATOS, D., The Role of Competition in Creating Multiple Steady States and Favouring Evolution of Prebiotic Polymers 313

BOLDRINI, P., New Chemical Interpretation of What Calcifies in the Arteries 325

PORTELLI, G., The Relation Between the Precodons of Overlapping Genes 341

WADE, M. J., The Effect of Multiple Inseminations on the Evolution of Social Behaviors in Diploid and Haplo-diploid Organisms . 353

BOROUJERDI, M., The Comparability of Pharmacokinetics of Creatinine in Rabbit and Man: a Mathematical Approach . 367

JANETOS, A. C., Active Foragers vs. Sit-and-wait Predators: a Simple Model 383

ORWICH, K. H. and SIU, S., Power Functions in Physiology and Pharmacology 387

ORWICH, K. H., Can Diffusion Coefficients be Estimated from Plasma Clearance Curves of Intact Animals? 399

ETTERS TO THE EDITOR

HILL, J. M. and LEE, A. I., Solutions for Water Transport through Plant Tissue 409

LEVITAN, E. and PALTI, Y., The Equivalent Valency and the Transition Dipole Moment in the Interpretation of the *n*, *m* and *h* Parameters in the Hodgkin–Huxley Model 413

Number 3, 7 April 1982

RAIG, J. L. and JENKINS, P. F., The Evolution of Complexity in Broadcast Song of Passerines 415

UHN, E., Programmed Synthesis of Informational Molecules Monitored by Linear and Circular Genetic Control Chains . 423

ARDELL, J. M., BARDSLEY, W. G., KAVANAGH, J. P. and WOOD, R. M., The Probability of Obtaining Complex Kinetic Curves for Enzyme Mechanisms with Cubic Terms in the Pseudo-steady State Rate Equations 465

EFEBVRE, G. M. and ANTIPPA, A. F., The Kinetics of Germination in Bacterial Spores 489

WABB, E. A., Dynamics of Fluid Accumulation in Intestinal Segments 517

RANE, C. R. and YERBURY, M. J., Measuring Thermal Time Constants in Reptiles Under Conditions of Linearly-varying Ambient Temperatures 531

ORN, R. W., Positional Specificity Within Plant Cells . . . 543

INKEVICH, I. G., Physico-chemical Properties of Organic Compounds and the Energetics of Metabolism 569

AITÔ, N., Asymptotic Regular Pattern of Epidermal Cells in Mammalian Skin 591

LETTER TO THE EDITOR

NAORA, H. and DEACON, N. J., Implication of the Effect of Extragenic Territorial DNA Sequences on a Mechanism Involving Switch-on/off of Neighbouring Genes by Transposable Elements in Eukaryotes 601

Number 4, 21 April 1982

CLAWSON, G. A. and SMUCKLER, E. A., A Model for Nucleocytoplasmic Transport of Ribonucleoprotein Particles . . . 607

BROWN, J. L., Optimal Group Size in Territorial Animals . . 795

ZIMÁNYI, L. and GARAB, GY., Configuration of the Light Induced Electric Field in Thylakoid and its Possible Role in the Kinetics of the 515 nm Absorbance Chance 811

LETTER TO THE EDITOR

DUGGLEBY, R. G., Application of Non-linear Regression to the Analysis of Histidine Transport by S37 Ascites Tumour Cells . 827

Index to Volume 95

bsorbance chance, 515 nm, configuration of the light induced electric field in thylakoid and its possible role in the kinetics of, 811
IHARA, K. and MATSUMOTO, G., Temporally coherent organization and instabilities in squid giant axons, 697
llometry, rethinking of, 37
ltruism and sex ratio, 305
mbient temperatures, linearly-varying, measuring thermal time constants in reptiles under conditions of, 531
mino acid compositions of proteins: collagen, cytochrome c, ferredoxin and α-crystallin, influence of selective processes on, 615
nimal fatty acid synthetases, a model for the mechanism of action of, 263
nimals, territorial, optimal group size in, 793
NTIPPA, A. F. (see LEFEBVRE, G. M.), 489
rteries and myocardium, intracellular magnesium crystallized in; new chemical-physical hypothesis, 641
rteries, a new chemical interpretation of what calcifies in, 325
scites tumour cells, S37, application of non-linear regression to the analysis of histidine transport by (letter), 823
symptotic regular pattern of epidermal cells in mammalian skin, 591
xons, giant, squid, temporally coherent organization and instabilities in, 697

acterial peptidoglycan, quantum chemical studies on the conformational structure; CNDO and INDO calculations on the N-acetyl-glucosamine, 167
acterial peptidoglycan, quantum chemical studies on the conformational structure; PCILO calculations on the monosaccharides, 151
acterial peptidoglycan, quantum chemical studies on the conformational structure; PCILO calculations on the disaccharide part of the glycan moiety, 285
acterial spores, the kinetics of germination in, 489
ARACH, J. P. (see WIKSWO, J. P., Jr.), 721
ARDSLEY, W. G. (see WARDELL, J. M.), 465
ARNICKEL, G. (see YADAV, J. S.), 151, 167, 285
ASS, L., The variance of transit times of indicators through a vascular bed, 81
iochemical and chemical structures, application of order and complexity to, 225
irds and fishes, differences between, in spatial parameters and interspecific social relations, 253
OLDRINI, P., Intracellular magnesium crystallized in the arteries and myocardium: new chemical–physical hypothesis, 641
OLDRINI, P., New chemical interpretation of what calcifies in the arteries, 325
OROUJERDI, M., The comparability of pharmacokinetics of creatinine in rabbit and man: a mathematical approach, 369
RADACZEK, H. (see YADAV, J. S.), 151, 167, 285
RAUER, F. and SOUDACK, A. C., On constant effort harvesting and stocking in a class of predator-prey systems, 247

Broadcasting song of passerines, the evolution of complexity in, 415
BROWN, J. L., Optimal group size in territorial animals, 793
BUSKIRK, R. E. (see FROHLICH, C.), 13

Calcification in the arteries, a new chemical interpretation of, 325
Capitula, computer simulation of contact pressure in, 1
CARACO, T. (see PULLIAM, H. R.), 89
CARROLL, J. P., On emmetropization, 135
Cation content, hemoglobin content, membrane area, volume, and density of human red cells, relations among variations in, 123
Cells, epidermal, in mammalian skin, asymptotic regular pattern of, 591
Cells, plant, positional specificity within, 543
CHAPMAN, J. B., A kinetic interpretation of "variable" stoichiometry for an electrogenic sodium pump obeying chemiosmotic principles, 665
Chemical and biochemical structures, application of order and complexity to, 225
Chemical interpretation of what calcifies in the arteries, 325
CLAWSON, G. A. and SMUCKLER, E. A., A model for nucleocytoplasmic transport of ribonucleoprotein particles, 607
Cloning, strategies for constructing complementary DNA for, 679
CNDO and INDO calculations on N-acetyl-glucosamine. Quantum chemical studies on the conformational structure of bacterial peptidoglycan, 167
Collagen, cytochrome c, ferredoxin and α-crystallin, influence of selective processes on the amino acid compositions of, 615
Competition, its role in creating multiple steady states and favouring evolution on prebiotic polymers, 313
Complex kinetic curves for enzyme mechanisms with cubic terms in the pseudo-steady state rate equations, the probability of obtaining, 465
Complexity in broadcasting song of passerines, the evolution of, 415
Complexity and order: application to chemical and biochemical structures, 225
Computer simulation of contact pressure in capitula, 1
Configuration of the light induced electric field in thylakoid and its possible role in the kinetics of the 515 nm absorbance change, 811
Conformational structure of bacterial peptidoglycan, quantum chemical studies on; CNDO and INDO calculations on the N-acetyl-glucosamine, 167
Conformational structure of bacterial peptidoglycan, quantum chemical studies on; PCILO calculations on the disaccharide part of the glycan moiety, 285
Conformational structure of bacterial peptidoglycan, quantum chemical studies on; PCILO calculations on the monosaccharides, 151
Constant effort harvesting and stocking in a class of predator–prey systems, 247
Contact pressure in capitula, computer simulation of, 1

CRAIG, J. L. and JENKINS, P. F., The evolution of complexity in broadcasting song of passerines, 415
Creatinine in rabbit and man, a mathematical approach to the comparability of pharmacokinetics of, 369
Cytochrome c, collagen, ferredoxin and α-crystallin, influence of selective processes on the amino acid compositions of, 615

DEACON, N. J. (see NAORA, H.), 601
Diffusion coefficients: can they be estimated from plasma clearance curves of intact animals?, 399
Diploid caste members, sterile, use of groups consisting of a mating pair and; a theory of natural selection incorporating interaction among individuals, 181
Diploid and haplo-diploid organisms, the effect of multiple inseminations on the evolution of social behaviors in, 351
Diploid and haploid caste members, use of groups consisting of a mating pair together with; a theory of natural selection incorporating interaction among individuals, 199
Disaccharide part of the glycan moiety, PCILO calculation on; quantum chemical studies on the conformational structure of bacterial peptidoglycan, 285
DNA, complementary, for cloning, strategies for construction of, 679
DNA duplication, inverse, some indications for, 783
DNA sequences, territorial, extragenic, implication of their effect on a mechanism involving switch-on/off of neighbouring genes by transposable elements in eukaryotes (letter), 601
DRANE, C. R. and YERBURY, M. J., Measuring thermal time constants in reptiles under conditions of linearly-varying ambient temperatures, 531
Drosophila, a model of pattern regulation in tergite of, 731
DUGGLEBY, R. G., Application of non-linear regression to the analysis of histidine transport by S37 ascites tumour cells (letter), 823
Dynamics of fluid accumulation in intestinal segments, 517
Dynamics and self-organization of an open futile cycle, 105

Electric field, light-induced, in thylakoid: configuration and possible role in the kinetics of the 515 nm absorbance chance, 811
Emmetropization, on, 135
Energetics of metabolism and the physico-chemical properties of organic compounds, 569
Enzyme mechanisms with cubic terms in the pseudo-steady state rate equations, the probability of obtaining complex kinetic curves for, 465
Epidermal cells in mammalian skin, asymptotic regular pattern of, 591
Eukaryotes, implication of the effect of extragenic territorial DNA sequences on a mechanism involving switch-on/off of neighbouring genes by transposable elements in (letter), 601
Evolution of complexity in broadcasting song of passerines, 415
Evolution of prebiotic polymers, the role of competition in creating multiple steady states and the favouring of, 313
Evolution, probability of life and the rareness of realization in, 145
Evolution of social behaviors in diploid and haplo-diploid organisms, the effect of multiple inseminations on, 351
Extragenic territorial DNA sequences, implication of their effect on a mechanism involving switch-on/off of neighbouring genes by transposable elements in eukaryotes (letter), 601

Fatty acid synthetases, animal, a model for the mechanism of action of, 263
Feeding, suction, in fish, a quantitative hydrodynamical model of, 49

Ferredoxin, collagen, cytochrome c and α-crystallin, influence of selective processes on the amino acid compositions of, 615
Fish, a quantitative hydrodynamical model of suction feeding in, 49
Fishes and birds, differences between, in spatial parameters and interspecific social relations, 253
Fluid accumulation in intestinal segments, dynamics of, 517
Foragers, active, vs. sit-and-wait predators: a simple model, 381
Foraging, optimal, and sex ratio in parasitic wasps, 43
FROHLICH, C. and BUSKIRK, R. E., Transmission and attenuation of vibration in orb spider webs, 13
Futile cycle, open, self-organization and dynamics of, 105

Game-theoretical approach to the scanning behaviour of juncos, 89
GARAB, GY. (see ZIMÁNYI, L.), 811
GAUBATZ, J. and PADDOCK, G. V., Strategies for constructing complementary DNA for cloning, 679
Genes, neighbouring, implication of the effect of ectragenic territorial DNA sequences on a mechanism involving switch-on/off of, by transposable elements in eukaryotes (letter), 601
Genes, overlapping, the relation between the precodons of, 345
Genetic control chains, linear and circular, programmed synthesis of informational molecules monitored by, 423
Germination kinetics in bacterial spores, 489
GREEN, R. G., Optimal foraging and sex ratio in parasitic wasps, 43
GRIFFING, B., A theory of natural selection incorporating interaction among individuals. IX. Use of groups consisting of a mating pair and sterile diploid caste members, 181
GRIFFING, B., A theory of natural selection incorporating interaction among individuals. X. Use of groups consisting of a mating pair together with haploid and diploid caste members, 199
Group size, optimal, in territorial animals, 793

Haplo-diploid and diploid organisms, the effect of multiple inseminations on the evolution of social behaviors in, 351
Haploid and diploid caste members, use of groups consisting of a mating pair together with; a theory of natural selection incorporating interaction among individuals, 199
Harvesting and stocking, constant effort, in a class of predator–prey systems, 247
HARVEY, P. H., On rethinking allometry, 37
Hemoglobin content, cation content, membrane area, volume, and density of human red cells, relations among variations in, 123
HILL, J. M. and LEE, A. I., Solutions for water transport through plant tissue (letter), 409
Histidine transport by S37 ascites tumour cells, application of non-linear regression to the analysis of (letter), 823
Hodgkin–Huxley model, the equivalent valency and the transition dipole moment in the interpretation of the n, m and h parameters (letter), 413
HOFACKER, G. L. (see COUTELLE, R.), 615

Human red cells: relations among variations in density, volume, membrane area, hemoglobin content and cation content, 123
Hydrodynamical model, quantitative, of suction feeding in fish, 49

Indicator transit times through a vascular bed, the variance of, 81
Individuals, a theory of natural selection incorporating interaction among; use of groups consisting of a mating pair together with haploid and diploid caste members, 199
Individuals, a theory of natural selection incorporating interaction among; use of groups consisting of a mating pair and sterile diploid caste members, 181
INDO and CNDO calculations on N-acetyl-glucosamine. Quantum chemical studies on the conformational structure of bacterial peptidoglycan, 167
Informational molecules, programmed synthesis of, monitored by linear and circular genetic control chains, 423
Inseminations, multiple, their effect on the evolution of social behaviors in diploid and haplo-diploid organisms, 351
Intestinal segments, dynamics of fluid accumulation in, 517
Inverse DNA duplication, some indications for, 783

Synthesis, programmed, of informational molecules monitored by linear and circular genetic control chains, 423

Tergite of *Drosophila*, a model of pattern regulation in, 731
Territorial animals, optimal group size in, 793
Thermal time constants: measurement in reptiles under conditions of linearly-varying ambient temperatures, 531
Thylakoid: configuration of the light induced electric field and its possible role in the kinetics of the 515 nm absorbance chance, 811
Time constants, thermal, in reptiles: measurement under conditions of linearly-varying ambient temperatures, 531
TORO, M. A., Altruism and sex ratio, 305
Transit times of indicators through a vascular bed, the variance of, 81
Transition dipole moment and equivalent valency in the interpretation of the *n*, *m* and *h* parameters in the Hodgkin–Huxley model (letter), 413
Transport, histidine, by S37 ascites tumour cells, application of non-linear regression to the analysis of (letter), 823
Transport, nucleocytoplasmic, of ribonucleoprotein particles, a model for, 607
Transport of water through plant tissue, solutions for (letter), 409

Valency, equivalent, and the transition dipole moment in the interpretation of the *n*, *m* and *h* parameters in the Hodgkin–Huxley model (letter), 413
Vascular bed, the variance of transit times of indicators through, 81
VENIERATOS, D., The role of competition in creating multiple steady states and favouring evolution of prebiotic polymers, 313
VERHAGEN, J. H. G. (see MULLER, M.), 49
Vibration in orb spider webs, transmission and attenuation of, 13

WADE, M. J., The effect of multiple inseminations on the evolution of social behaviors in diploid and haplo-diploid organisms, 351
WARDELL, J. M., BARDSLEY, W. G., KAVANAGH, J. P. and WOOD, R. M., The probability of obtaining complex kinetic curves for enzyme mechanisms with cubic terms in the pseudo-steady state rate equations, 465
Wasps, parasitic, optimal foraging and sex ratio in, 43
Water transport through plant tissue, solutions for (letter), 409
Webs, orb spider, transmission and attenuation of vibration in, 13
WIKSWO, J. P., JR. and BARACH, J. P., Possible sources of new information in the magnetocardiogram, 721
WOOD, R. M. (see WARDELL, J. M.), 465

YADAV, J. S., BARNICKEL, G., BRADACZEK, H. and LABISCHINSKI, H., Quantum chemical studies on the conformational structure of bacterial peptidoglycan. II. PCILO calculations on the monosaccharides, 151

YADAV, J. S., BARNICKEL, G., BRADACZEK, H. and LABISCHINSKI, H., Quantum chemical studies on the conformational structure of bacterial peptidoglycan. III. CNDO and INDO calculations on the N-acetyl-glucosamine, 167
YADAV, J. S., BARNICKEL, G., BRADACZEK, H. and LABISCHINSKI, H., Quantum chemical studies on the conformational structure of bacterial paptidoglycan. IV. PCILO calculation on the disaccharide part of the glycan moiety, 285
YERBURY, M. J. (see DRANE, C. R.), 531

ZIMÁNYI, L. and GARAB, GY., Configuration of the light induced electric field in thylakoid and its possible role in the kinetics of the 515 nm absorbance change, 811
